

AUTOMATIC CALLBACK

Keeps redialing busy number and alerts you when the line is free.

Let your phone work for you! With Automatic Call Back, you can eliminate the aggravation of constantly-busy numbers.

Once Automatic Call Back is activated, your line remains open for other incoming calls while Automatic Call Back attempts to make a call for you. When the call is completed, a ring signals you to pick up the phone.

How To Use:

- When you hear a busy signal, depress the "switchhook" and release quickly. Listen for a special dial tone.
- If you've already hung up, pick up the handset and listen for a normal dial tone.
- Press *66.
- If the line is still busy, hang up. Your phone will check the number for up to 30 minutes.
- A special callback ring alerts you if the line becomes free (some phones ring normally).
- Pick up the handset to automatically place the call.

To cancel:

- Depress the "switchhook" and release. Listen for a special dial tone.
- If you've already hung up, lift the handset and listen for a normal dial tone.
- Press *86.
- Listen for confirmation tone or announcement. Hang up.

Notes:

- The "switchhook" is the round, flat, or square button you push to hang up the phone.
- To restart the 30-minute clock, repeat steps 1 through 4.
- Service does not work on 800 numbers, 900 numbers, numbers outside the specified service area, or on lines where Call Forward and some other call services have been activated.
