

CALL FORWARD

Now when you are away from your home, your calls can be automatically sent to you. With CALL FORWARD, there is no need to leave messages about where you are or reveal any forwarding numbers.

To forward your calls...

- Lift the handset and listen for dial tone.
- Dial *72.
- Listen for the special dial tone.
- Now, dial the number where you want your calls to be forwarded. (You can use SPEED CALLING codes if you have this feature).

The CALL FORWARD feature is in effect when someone answers at the forwarded number.

If there is no answer at the forwarded number, or if the line is busy, hang up the phone and repeat the steps above. If you do so within two minutes, you'll hear two "beeps," meaning your CALL FORWARD feature is now working.

Once you've activated CALL FORWARD, your phone will make one short ring each time a call is forwarded. You can still make outgoing phone calls from this phone.

If you wish to change the number to which your calls are being forwarded, just deactivate the feature (see below), then follow the steps above to forward your calls to a new number.

To deactivate CALL FORWARD...

- Lift the handset and listen for the dial tone.
- Dial *73.
- Listen for two beeps, then hang up. The feature is no longer in effect, and calls will ring on your phone.
