

LONG DISTANCE TOLL CONTROLLER (CUSTOMER ACTIVATED TOLL BLOCKING)

Take control of the long distance calls made from your telephone!

Sometimes guests in your home, the children, or friends who may use your telephone do not share your concerns about controlling your household costs. Now you can control these costs and feel secure knowing there will not be any surprises on your long distance phone bill.

With Long Distance Toll Controller no long distance calls can be made without the access code to your long distance network. You can set or change the PIN # whenever necessary.

When you order Long Distance Toll Controller (Customer Activated Toll Blocking) you will need to select a code (or NATCO will assign a default code).

How To Use:

(Note: There is a delayed pause between each step.)

- Dial a long distance number
- Voice prompt then enter your PIN # (Personal Identification Number) - XXXX
- Call goes through

To Change Your PIN #:

- Lift handset & press *91
- When prompted for feature access code press *92
- You'll hear "activation code blocked"
- When prompted enter your old PIN # XXXX
- When prompted enter your new PIN # (4 digits)
- When prompted confirm/enter your new PIN #
- You'll hear "PIN is updated" - you're done!
